

## **Montana Audubon Center -- COVID Protocols**

**Updated August 17, 2021**

To keep our program participants safe, we are implementing the following procedures for all programs. Our goal is to have the vast majority of our programming occur outside.

### Face Coverings & Physical Distancing

- A face covering is required during indoor activities for all program participants when unable to maintain a 6-foot distance from each other.
- A face covering will not be required when participants are outdoors.

### Hygiene & Sanitation

- Program participants will wash or sanitize hands upon arrival.
- Program participants will wash or sanitize hands before and after consuming food.
- A handwashing station is available, or program participants may use their own sanitizer.
- Equipment will be thoroughly disinfected between groups.
- Program participants must supply their own water bottle. Water refills are available, and water bottles are available in the case of emergency.

### Participants may not attend programming if:

- They have been exposed to someone with COVID-19 in the last 14 days.
- Their temperature is 100.4 degrees or greater.
- They are exhibiting other symptoms of COVID-19 including one of the following: difficulty breathing, new, unexplained persistent cough, loss of taste/smell, nausea/vomiting, diarrhea; or two of the following: headache, sore throat, body aches, fatigue, congestion or runny nose (new or unexplained).
